Recognition & Management Of The Sick Neonate

“Really helped to improve my confidence. Allows us time to explore our learning in these scenarios in a safe environment.”

“Watching the scenarios back is really helpful and gives a realistic oversight of what’s happened.”

- A bespoke course delivered on-site and involves a mix of multi-disciplinary teams at all different levels of their training, including nurses, doctors of all tiers, nursing associates and more.
- High-fidelity simulation in the clinical environment.
- Includes a bespoke human factors teaching discussion to help develop the best team.
